DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim, Korean Patent Publication 1020010074076A.

Regarding claim 1, Kim discloses a micro-speaker including a yoke (8), a permanent magnet (on yoke 5), a plate (on top of center yoke), a vibration plate (1) with a first suspension integrated (4, bottom section) therewith, a voice coil (5), a frame (2) comprising: a second suspension (4, top section) which is made of highly resilient material and installed between the plate and the vibration plate, wherein the voice coil (indirectly through a bobbin) is attached to a lower surface of the second suspension, the vibration plate is attached to an upper surface of the second suspension, and an outer periphery of the second suspension is fixed to the frame (See Fig. 1 and abstract translation). Kim does not expressly disclose a protector. However, the use of protectors (grills) are well known in the art and therefore, It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a protector to prevent damage to the vibrating plate of the speaker.

Allowable Subject Matter

Art Unit: 2615

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
